Read This First

Thank you for your purchase. We appreciate your business. We want you to succeed using Pro/ENGINEER and/or Creo Parametric. Some helpful tips for using our textbooks are listed below.

- Be sure to thoroughly read the introduction section of the book.
- Please download the required exercise files located on our website at the following location: www.cadquest.com/download
- Our download area does not contain Pro/ENGINEER or Creo Parametric software. You must purchase and install Pro/ENGINEER or Creo Parametric before you can perform the exercises in the textbook.
- In the download table, locate the row that matches the title of the book you purchased.
- If you are using the commercial version of Pro/ENGINEER or Creo Parametric, the required files are located in the column called 'Commercial Version'.
- If you are using the student edition of Pro/ENGINEER or Creo Parametric, the required files are located in the column called 'Student Edition'.
- After downloading the appropriate files, copy the files to a folder on your computer. Please read the first few pages of the textbook for a recommended location for this folder.
- For some of our titles, you must add and apply the appropriate configuration options to your Pro/ENGINEER or Creo Parametric installation before starting the exercises in the book.
- The appropriate configuration options are usually listed on page 3 or 4 of the book.
- Some of our titles do not have required configuration options.
- If you need assistance adding configuration options, please refer to this reference document on our web site:
www.cadquest.com/books/pdf/config.pdf
- In most cases, you must successfully complete the exercises in chronological order, starting with Exercise 1.
- If you require further assistance, please email us: mail@cadquest.com
